

cdc air sussension

Beitrag von „juma“ vom 21. August 2007 um 08:16

Hi,

[Zitat von boutrosa](#)

[...]Whats your opinion on the cdc air suspension? Is it worth the money? I am not really interested in being able to change the height of the touareg. its a fun/ safe feature that may save under the touareg.

What about ride quality on rough roads? I am more interested on if it makes a difference in ride quality. I want a very comfortable ride but not a bouncing vehicle.

I'm very enthusastic with the air suspension. I use it nearly every day, allways when leaving normal roads to offraod terrain. In automatic status, the chassis is elevated automatically, so you don't have to care about your undercoat 😊

Btw, it saves fuel...

So, if you don't have to care about the \$, take it! 🙌
