

Rns510 & Original Dvb-t Tuner

Beitrag von „ceramicax“ vom 22. Oktober 2007 um 15:25

Hello,

first at all excuse for writing in english on a german forum, but writing german is not possible for me  .

i got a big question, if I got a car with the MFD2 navigation system mounted, and TV-Tuner mounted too, when I change me MFD2 into a RNS510 i'll be in trouble because the MFD2 video input kable is 18 pins, and the RNS510 has 26 pins.

Anyone know with is the reference of this cable (26 pines) for plugging original TV tuner (or rear camera) with the RNS510?????

Best regards.
