

RNS510 & Rear Camera

Beitrag von „juma“ vom 20. Mai 2008 um 07:27

Hi,

[Zitat von ceramicax](#)

Let's try english.

I mounted RSN510 and then I tried with 7L6907411 Unit, but this one is not compatible with RNS510 is only for MFD2. Then I bought 7L6907441B unit but still doesn't works, I always get message "Incorrect Software Version". Any exit??

OK, the first important information to have is what kind of Touareg do you use? What's the age of the car.

That is important for the CAN-Bus-System. In older models it is 1.6 and in the next generation (with the new headlights) it is 2.0.

It depends on the model which parts are needed. So just give me that information first, please!
