Hi,

OK, the first important information to have is what kind of Touareg do you use? What's the age of the car.

That is important for the CAN-Bus-System. In older models it is 1.6 and in the next generation (with the new headlights) it is 2.0.

It depends on the model which parts are needed. So just give me that information first, please!

Hello Juma, thanks for your fast answer, yes the car is new Touareg 2.0 CANBUS System

Best regards
