Zitat von pit

Habe jemanden gefunden, der iPod-Dockingstations für Autos baut. Werde mich wieder melden, wenn er bereits Erfahrung mit einem Dicken - hat...

[-> TUNERTRICKS](#)

...

Hier das erste Feedback von ihm:

I just did a Touraeg last week and took many photos. I put the dock under the cupholder located in the center console, so you could use the dock or replace the rubber insert and use it as a...cupholder. Anyway, the photos are on my camera at work, so I'll try and get them to you tomorrow or Monday evening if that would be okay. I also modified the factory radio to accept auxiliary input, which was pretty cool. No adapter necessary, just straight in with the iPod audio. Thanks for your interest and I'll get those to you within the next couple of days.

Also warten wir gespannt auf die Bilder!

Gruss Pit
