Apple News | MagicPad Features Copy and Paste for iPhone
Tuesday, 29th July 2008, 03:07 pm
MagicPad will be the first app to finally bring copy & paste functionality to the iPhone. It is labelled as the first real text editor for the iPhone.

Cut, Copy & Paste
Tap and drag across text to copy it, and then paste it within the document or to a brand new note.

Create Rich Text Documents
Choose from 6 different font styles, 5 different sizes, and 8 unique colors. Add bold, italics, underline, and strikethrough effects to make your documents standout.

Email Your Documents
Send your rich text documents to anyone via e-mail.

MagicPad by Proximi was recently submitted to Apple for verification and inclusion into the App Store.
