Apple News | Apple Seeds iPhone 2.1 Beta 2 Firmware

Thursday, 31st July 2008, 09:07 am

Apple has seeded iPhone 2.1 Beta 2 firmware to developers which includes bug fixes to the iPhone OS.

"This is the second beta of the iPhone SDK targeting iPhone OS 2.1, including bug fixes to iPhone OS as well as an early implementation of the Apple Push Notification Service API. This API is not yet integrated with a live push server."

Not all iPhone developers have access to the seeds. The first 2.1 seed was only available to iPhone developers who had been accepted into the program before to July 11th.

Klasse Chris.

Ich freue mich für Dich!

Übrigens ist die 2.1 Beta auch schon raus. Verbesserte Funktionen sollen wohl GPS related sein und es wird gemunkelt das copy und paste dann wohl endlich auch gehen wird! 🤖
