Apple News | Apple Releases iPhone 2.0.2 Firmware

Monday, 18th August 2008, 06:08 pm

Apple has released a new 2.0.2 iPhone Firmware update for download through iTunes.

The new version has no specific description besides the usual "bug fixes" notation.

If you have a 3G iPhone and would like to jailbreak and unlock it we suggest waiting until PwnageTool is updated to support this firmware.
