

# Apples iPhone kommt

**Beitrag von „Thanandon“ vom 1. Juli 2009 um 09:28**

Hauptsächlich wird das Baseband upgedated!

Hier der Rest:

Here are some new features that have been discovered in iPhone OS 3.1 beta so far:

The baseband has been updated to 5.08.01 - ultrasn0w users should not use the iPhone OS 3.1 beta, otherwise their iPhones could be permanently locked!

iPhone 3GS - When you're trimming your videos you now have the option of saving the original video by tapping the "Save as copy" button.

Voice Control is finally working over bluetooth now!

When you move your icons around the iPhone vibrates

MMS is enabled by default but does not work for AT&T users

The AT&T profile is updated to 4.2

Improvements to OpenGL and Quartz

There's now a VideoEditorController API - Allows third party apps to call up video editing UI

Video picker API
