

# Abgas-Werkstatt Fehlermeldung; Saugrohrklappe defekt

Beitrag von „Annakin“ vom 22. Juli 2009 um 22:06

[Zitat von K12MoRS](#)

Hello

Since I live in Danmark, I have much easier writing in English. I hope it is OK or somebody may translate for me.

My 2006 V6TDI has the same problem. The local werkstatt has for 4 days tried to find the cause of the problem, but with no luck. Has anybody got it fixed permanently at all ?

The car is now running the latest update in software from VW.

Sincerely yours

Hi,

let them check the turbo charger and all sensors of the exhaust. My former R5 had all these problems...

P.S.: Welcome to our discussion forum...
