Hi,

if possible, write in english please...I can't understand the german words 😞

[Zitat von juma](#)

Hi, no problem...your German is much better than my Romanian 😊

How old is the battery?

I would try to recharge the battery with a charger and if the battery will brake down again, you can change the battery later. I would not change the battery right now, 'cause you do not know what the VW-mechanics did or did not...😬

Question was: if I can me with my hand?, as I have **already** bought the battery:),not to go to pay for labor at VW 😬

Mfg

Marian
