Vitaliy,

do you already have LED back lights installed?

If not, it will be a big problem to reprogram your car for LED lamps, which is only possible to be done in Wolfsburg. I would expect, that this would never work between Germany and Kaliningrad.

I already have LED back lights installed but I want the lights like on Touareg Edition X. For buying them I need serial number of this lights. I'll be grateful if you can give me this information.
