

Need help finding correct part number

Beitrag von „spockcat“ vom 8. Juni 2004 um 17:36

Roland,

Thank you VERY MUCH for your reply. So this wood trim piece does not have the key switch to shut off the airbag on the right side of the shift lever? It has only three holes?

Not that I do not believe you but I want to be sure we are understanding each other. This is because the part number 7L6 863 916 CT 2WE has the model code of 4UE and the MSP page says "driver and passenger airbags with the possibility of deactivating front passenger airbag". I took that to mean that there is a manual switch to turn off the passenger airbag and that switch is on the center console.

A picture would completely cure my fears.

Jim
