

VW Individual Design Package

Beitrag von „jonee“ vom 3. April 2006 um 12:48

Great, Thanks
(don't hesitate to send more)

Is it just me, or do you guys also think that the Design Package looks better on a silver Touareg?

I don't see much difference between a standard black T and a design package equipped black T. I would prefer black if the lower part of the front and rear spoilers had chrome bars just as the W12 has. But that's not the case.

Still looking for a shadow blue one. (And the VW car configurator pics are too dark according to me)
