

Ipod + Harman Kardon Drive&Play

Beitrag von „EzioS“ vom 10. Oktober 2006 um 16:21

Woow, this really looks good. Seems to be an alternative to Icelink and other Ipod solutions.

Now getting into the nitty gritty, could we get to know the price of this conversion kit and would you recommend to have the kit fitted by a dealer/workshop or would you attempt to fit the kit yourself again?

From the handling point of view, please let us know the Pro's and Con's??

Thanks in advance,
Ezio
