

Question for a Thule bike rack

Beitrag von „Javier“ vom 9. Januar 2009 um 14:33

Mensaje Hi.

First of all, sorry for the inconvenience to write in English, but my mother language it's the Spanish and I didn't know any word in German. Sorry again.

The question it's I'm looking for a bike carrier to my Touareg to trans port tree mountain bikes in the rear of the car. I haven't the had the trailer hitch installed so, my options are reduced to systems like the Thule Backpack 973, or similar.

http://www.4youcar.de/ebaypics/thule/thule_973_b.jpg

I have been checking the official Thule webpage and the VW Touareg doesn't appear as a compatible vehicle, also for the Thule Clipon High system, probably due to the specific part adaptors.

<http://www.roofrackshop.co.uk/bike/bike.h8.gif>

So the question it's, does any of you guys installed any Thule bike rack system in your Touareg? which adaptors are you use it?.

In case this it's impossible, which one are you using it?

Thanks a lot , and sorry if this is an already treated issue, but use the search engine in a language you can't understand it's a nightmare.

Javier.-

Hi Javier,

welcome to the forum! 

<https://www.touareg-freunde.de/forum/thread/10545-question-for-a-thule-bike-rack/>

I use a bike carrier, but one or the trailer hitch, so that's nothing for your car.

But there are carriers like the one you need: [Paulchen](#)

For 3 bikes, it's about 460,- EUR

But I think, there are other users who will help you with your problem, too... 🤖
