Memory Seats and Remote Key

Beitrag von „V6TDI" vom 21. März 2005 um 23:22

Hello,

I have the power seats and the memory packet.
How link the seat memory to a particular remote key ?
I have tried the instructions in the manual without success.

Best regards,

R.

Hi,
you must store the seat position by pressing set and memory 1 (example), pull out the key and press the door-open buttom on the key for more than 10 sek.; a ping will be hear. Now it will be work. The seat go in the stored position wenn you open the door. In my Touareg it will be work fine.

greeting, Jörg

Hello,

Thank you a lot , it works !

Best regards,

R.

that's fine to hear,

buy the way, the driver manual is in that case not correct. The trick ist to pull out the key.

greeting's Jörg

Hello IT-CS,

And for cancelled the link , can you tell me the procedure ?

R
